## SUMMARY

Full Stack Developer building and maintaining production web applications with Next.js and NestJS (TypeScript), backed by MySQL. Part of Jumia's central development team in Porto (remote), where I cut API response times by 40% and shipped internal HR tools used by 1,000+ employees. Strong in REST API design, relational and NoSQL data modeling, and Agile delivery. Trilingual: English, French, Arabic.

## TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), TypeScript, Python, SQL

**Frontend:** Next.js, Angular, Responsive design, Bootstrap, Ant Design

**Backend:** NestJS, REST API design, JWT authentication

**Databases:** MySQL, MongoDB

**Tools & DevOps:** Git, GitHub, Docker, CI/CD, Postman, Retool, Vercel, npm, Firebase, Jira, Confluence

**Practices:** Agile/Scrum, Code review, Technical documentation, Performance optimization

## PROFESSIONAL EXPERIENCE

### Full Stack Developer

*Jumia Porto Tech Center — Central Team (Remote) | 2024/01 – Present | Tunis, Tunisia*

- Optimized SQL queries in the production leave-management system, cutting average response time by 40% and safeguarding data accuracy for 1,000+ active users.
- Authored Confluence runbooks and troubleshooting documentation that improved team issue-resolution speed by 15%.
- Designed and shipped an employee-acknowledgment web app (Next.js + NestJS) with e-signature capture, HR document uploads, and reporting dashboards.
- Automated recurring HR workflows with Retool, removing manual effort across the team.
- Built compensation-management features (package & salary editing) for an internal salary-review application.
- Modeled a normalized MySQL schema and contributed to peer code reviews and Agile/Scrum delivery.

### Supply Chain Manager

*Jumia Group — Local Team | 2019/04 – 2023/12 | Tunis, Tunisia*

- Non-technical supply-chain management role; studied software development in parallel and transitioned into Jumia's central development team in Porto in 2024 (3W Academy Full Stack diploma).
- Led and coached a team, sustaining strong service and quality levels.
- Defined and tracked performance KPIs and delivered structured feedback to lift team performance.
- Analyzed and streamlined operational processes to improve efficiency.
- Ran training sessions that strengthened team problem-solving and collaboration.

## Front-End Web Developer (Internship)

*B And Smile | 2023/09 – 2023/11 | Tunis, Tunisia*

- Built a responsive appointment-scheduling website (Angular, JavaScript, Bootstrap) for an orthodontics clinic.
- Designed and integrated validated patient-intake forms, streamlining the booking flow and UX.

## PROJECTS

---

### AI Image Generator

*Technologies : MERN Stack, OpenAI API*

- Full-stack MERN app generating images from text prompts via the OpenAI API, with user authentication and a dynamic UI.
- Optimized API calls to reduce response latency; deployed to production with secure access.

### E-Commerce Admin Dashboard

*Technologies : React, NestJS, MongoDB*

Stack: JavaScript, TypeScript, React, NestJS, Node.js, MongoDB, Multer, Axios.

- Built an e-commerce admin dashboard with user authentication, product management, and image uploads (Multer).

### School Management Platform

*Technologies : Angular, Node.js, MongoDB*

- Built a multi-role platform with admin, teacher, and student dashboards: user/course management, exam & exercise templates, student notes and to-do lists.
- Automated administrative follow-up across administration, teachers, and students.

## EDUCATION

---

**Full Stack Developer Diploma — 3W Academy | 2022/04 – 2023/04**

MEAN & MERN stack development

**Master's Degree — Carthage University | 2013/09 – 2018/06**

## LANGUAGES

---

English (Professional) | French (Professional) | Arabic (Native)
